ELSEVIER

Journal of Non-Crystalline Solids 203 (1996) ix–xii

JOURNAL OF NON-CRYSTALLINE SOLIDS

Contents

Preface vii

Contents ix

Section 1. Optical properties of oxide glasses

Quantitative IR spectroscopy: Applications to studying glass structure and properties
A.M. Efimov 1

On the connection between low frequency vibrational and relaxational motion in glasses
D. Quitmann, M. Soltwisch and G. Ruocco 12

Analysis of OH absorption bands in synthetic silica
O. Humbach, H. Fabian, U. Grzesik, U. Haken and W. Heitmann 19

Quantitative infrared spectroscopic measurement of hydroxyl concentrations in silica glass
K.M. Davis, A. Agarwal, M. Tomozawa and K. Hirao 27

Mm-wave absorption by two level systems in mesoscopic amorphous grains
N.I. Agladze, A.J. Sievers, S.A. Jones and J.M. Burlitch 37

Optical properties of 1,4-dihydroxyanthraquinone covalently bonded to SiO_2–$AlO_{3/2}$ gel
T. Ishiwaki, H. Inoue and A. Makishima 43

Optical second harmonic generation in poled MgO–ZnO–TeO_2 and B_2O_3–TeO_2 glasses
K. Tanaka, A. Narazaki, K. Hirao and N. Soga 49

Optical and electron paramagnetic resonance spectra of silica glass implanted with oxygen ions
Y. Morimoto, R.A. Weeks, R.H. Magruder III and R.A. Zuhr 55

Electron dose dependence and oxygen implantation effect on cathodoluminescence intensity in synthetic silica glass
Y. Morimoto, R.A. Weeks, A.V. Barnes, N.H. Tolk and R.A. Zuhr 62

Effects of glass forming conditions on the KrF-excimer-laser-induced optical damage in synthetic fused silica
D.R. Sempolinski, T.P. Seward, C. Smith, N. Borrelli and C. Rosplock 69

Synthesis and spectroscopic properties of (Cr^{4+}) doped sol–gels
P.S. Devi, H.D. Gafney, V. Petricevic and R.R. Alfano 78

ESR and optical absorption studies of Mn^{2+} ion doped silica and germania gels
Ch. Sumalatha, B. Sreedhar, M. Yamazaki, T. Takeuchi, K. Mori and K. Kojima 84

Preparation of polar oriented $Sr_2TiSi_2O_8$ films by surface crystallization of glass and second harmonic generation
Y. Ding, N. Masuda, Y. Miura and A. Osaka 88

Optical non-linearity in oxide glasses
E. Fargin, A. Berthereau, T. Cardinal, G. Le Flem, L. Ducasse, L. Canioni, P. Segonds, L. Sarger and A. Ducasse 96

Spectroscopic photoelasticity of lead–silica glass analyzed by polarization modulated ellipsometry
T. Fukazawa, M. Korekawa and Y. Fujita 102

Electric potential-related reflection from transparent metal/v-SiO_2/metal interfaces
C.Z. Tan and J. Arndt 109

Effects of substrate temperature and nominal dose on the microstructure and optical properties of indium implanted high purity silica
T.S. Anderson, R.H. Magruder, III, R.A. Weeks and R.A. Zuhr 114

The temperature and excitation wavelength dependence of the luminescence from Cr^{4+} in MgCaBa aluminate glass
X. Wu, S. Huang, W.M. Yen, B.G. Aitken and M.A. Newhouse 120

Section 2. Optical properties of non-oxide glasses and crystals

Non-oxide glasses for optical waveguide applications
J. Lucas, X.H. Zhang, K. Le Foulgoc, G. Fonteneau and E. Fogret 127

Lanthanum–fluoride addition to gallium–lanthanum–sulphide glasses
S.P. Morgan, D. Furniss and A.B. Seddon 135

Influence of processing parameters on the scattering properties of fluorozirconate glasses prepared by the gas film levitation technique
P. Baniel, A. Lopez, P. Gall and J. Granier 143

Glass-like properties observed in low-frequency Raman scattering of mixed fluorite crystals
J. Tu, S.A. FitzGerald, J.A. Campbell and A.J. Sievers 153

Influence of the glass network on the vibrational energy transfer from H_2O impurities in the Ge–As–Se glass series
B. Uebbing and A.J. Sievers 159

Far-infrared evidence for glass-like properties exhibited by crystals of CaF_2 doped with YF_3
S.A. FitzGerald, J.A. Campbell and A.J. Sievers 165

ESR and optical absorption spectra of Co^{2+} ions in $LiF–B_2O_3$ and $K_2SO_4–ZnSO_4$ glasses
B. Sreedhar, Ch. Sumalatha, H. Yamada and K. Kojima 172

Emission characteristics of Ge–Ga–S glasses doped with Tm^{3+}/Ho^{3+}
Y.S. Kim, W.Y. Cho, Y.B. Shin and J. Heo 176

Vibrational relaxation of D_2O in As_2S_3
J.R. Engholm, C.W. Rella, H.A. Schwettman and U. Happek 182

Independently relaxing nanoscale inhomogeneities as a model for structural relaxation: light scattering around the glass transition region
J. Schroeder, M. Lee, S.K. Saha, J.H. Whang and C.T. Moynihan 186

Section 3. Optical properties of glasses containing nanocrystals

Homogeneous nucleation of CdS nanocrystals in glass
P.D. Persans, H. Yükselici, L.B. Lurio, J. Pant, M. Stapleton and T.M. Hayes 192

Effect of phase separation on precipitation characteristics of CuCl quantum dots in the borosilicate glass system
Y.K. Yoon, W.-T. Han and S.J. Chung 195

Kinetics of growth of nanosized gold clusters in glass
P. Rao and R. Doremus 202

High temperature optical properties of CdS crystals in borosilicate glass
H. Yükselici and P.D. Persans 206

Fabrication of CdS/Ag hybrid quantum dot composites using a melt/quench method
M.-J. Ko, J. Plawsky and M. Birnboim 211

Optical studies on II–VI semiconductor quantum dots: Particle size dependence of the high pressure phase stability
J. Schroeder, L.-W. Hwang, M.R. Silvestri, M. Lee and P.D. Persans 217

Section 4. Electrical properties

Ionic transport in glasses
H. Kahnt 225

A review of critical experimental facts in electrical relaxation and ionic diffusion in ionically conducting glasses and melts
K.L. Ngai 232

Ion hopping processes and structural relaxation in glassy materials
J.E. Davidson, M.D. Ingram, A. Bunde and K. Funke 246

Recent progress in the area of NMR characterization of ionic transport and relaxation in glasses
O. Kanert, J. Dieckhöfer and R. Küchler 252

Effects of fictive temperature and water content on electrical conductivity of silica glasses
D.W. Shin and M. Tomozawa 262

Structural evolution during Ag^+/Na^+ ion exchange in a sodium silicate glass
M. Yamane, S. Shibata, A. Yasumori, T. Yano and H. Takada 268

The relationship between kinetic and thermodynamic properties in mixed alkali glass
H. Wakabayashi 274

Electric conduction of glasses at intermediate field strengths
J.L. Barton 280

Electrical conductivity, relaxation and the glass transition: A new look at a familiar phenomenon
P.W. Angel, M.R. De Guire and A.R. Cooper 286

Are the low temperature–low frequency and high temperature–high frequency ac conductivity of glasses the same phenomenon?
C.H. Hsieh and H. Jain 293

Scaling behavior in the conductivity of alkali oxide glasses, polymers, and doped crystals
D.L. Sidebottom, P.F. Green and R.K. Brow 300

Kinetics of relaxation process of hopping ionic conduction in lattice gas systems
H. Sato, A. Datta and T. Ishikawa 306

Correlation between far infrared absorption and electrical conductivity of rubidium germanate glasses
E.I. Kamitsos, Y.D. Yiannopoulos, H. Jain and W.C. Huang 312

A comprehensive view of the local structure around Rb in rubidium germanate glasses
H. Jain, E.I. Kamitsos, Y.D. Yiannopoulos, G.D. Chryssikos, W.C. Huang, R. Küchler and O. Kanert. 320

Fabrication and patterning surface conductive porous glass
J. Dong and H.D. Gafney 329

Novel oxide amorphous semiconductors: transparent conducting amorphous oxides
H. Hosono, M. Yasukawa and H. Kawazoe 334

Complex impedance analysis of the glass/solution interface in the glass electrode for pH measurement
T.J. Hwang and W.-T. Han 345

Electrical conductivity of V_2O_5–SrO–B_2O_3 glasses
N. Ichinose and Y. Nakai 353

Analysis of electrical relaxation in ionically conducting glasses and melts
C.T. Moynihan 359

Section 5. Other glass properties and processing

Viscosity of cadmium mixed halide glasses
R.F. Bartholomew, A.L. Sadd and P.A. Tick 364
Conversion of silica gel and silica glass mixed with various metal oxides into quartz
N. Takeuchi, S. Yamane, S. Ishida and H. Nanri 369
Mineralizing action of iron in amorphous silica
H. Nanri, N. Takeuchi, S. Ishida, K. Watanabe and M. Wakamatsu 375

Author index 381
Subject index 385
